

**RESCOTT, LLC**

*Stress-Free Networks*

“

Managing and troubleshooting desktops, networks, servers and IT security is rarely seen as a core activity by Small to Medium Size Businesses (SMBs). Some of the questions which come to your mind are- "Does hiring a full-time IT support specialist make sense? Can I pay a predictable monthly price rather than being at the mercy of IT support charges paid by the hour? How can I reduce downtime, poor performance and IT security breaches without paying through the nose? //

”

Relax!

You are not alone.

## >> Fact 1

SMBs report an average of over 50 hours of lost productivity a year per employee caused by IT problems.

## >> Fact 2

93% of IT problems can be proactively addressed via remote administration before they turn into performance problems, downtime, loss of data or security breaches.

## >> Fact 3

Current IT support providers profit when you face more IT problems rather than less!!!

Play it smart with Rescott Stress-Free Networks. We deliver a set of comprehensive IT management services at a predictable and affordable monthly cost. Rescott Stress-Free Networks provides top-class IT services and a sophisticated set of IT management tools, currently available only to Fortune 1000 companies. You get all of this without huge up-front investment or committing to long term contracts. Furthermore, start up time is minimal. Our technology allows us to proactively fix issues before they turn into problems and instantaneously attend to a problem to prevent disaster. Experience a higher level of service with Rescott Stress-Free Networks. Given the fact we charge a predictable monthly cost, we profit when our customers have fewer problems rather than more.

Rely on us — Rescott Stress-Free Networks .

## What we offer

Broadly speaking, we manage everything related to your desktops, networks and servers. Rescott Stress-Free Networks does specialized SQL database monitoring, e-mail protection and management, network management, server maintenance, desktop support, performance monitoring, patching, anti-virus updates, software deployments and much more. We have teams of certified engineers and technicians delivering high levels of IT support from our Network Operations Center on 24x7 basis.

### Server & Network Management

- Windows 2000/2003/2008 Server support and proactive maintenance
- Troubleshooting any alert that arises while monitoring systems
- Weekly check for viruses and event logs to identify problems and troubleshoot them
- Check and patch-up all security holes and verify data backup
- Management of all Hubs, Switches and other network devices

### Desktop Support

- Regularly deploy patches and update virus definitions
- Perform desktop tuning such as Defrag, Scandisk, Paging file optimizations, bottlenecks, etc.
- Deploy updates to software and service packs
- Support all off-the-shelf products and third-party applications
- Extend end-user technical support

### Security Management

- Proactive firewall maintenance and troubleshooting as soon as the problem arises
- Maintain logs of intrusion attempts from outside influences
- Continuously filter for bugs, Spyware, Malware and other threats
- Proactive monitoring of e-mail for spam and viruses before they affect the system

## Customer Benefits:

---

Rescott, LLC is a pioneer in proactive monitoring and preventive maintenance. We work towards making your systems work optimally. It sets you free from all the worries of cost and downtime and allows you to focus on your core business. You get affordable bills delivered consistently.

Benefits you will receive from Rescott Stress-Free Networks are:

"Our average time to resolve an IT problem from start to finish is 22 minutes."

### Preventive approach and Quick Response

- Reduce IT downtime and security issues by more than 70% via proactive management.
- Cut the attend time to a problem to less than 5 minutes via our remote management technology.

"We have been able to resolve 93% of IT issues remotely and proactively."

### Access to top notch expertise

- Your IT infrastructure is supported by a team of highly specialized and experienced engineers working from our Network Operations Center. You are relieved from being at the mercy of a technology "generalist".

"On average, we have delivered savings of more than 35% to our customers in terms of IT support costs."

### Access to superior IT Management technology

- We use SAAZ, a high-end IT management platform being used by companies such as Tupperware, Sony, LG Electronics and Carnegie Mellon.
- SAAZ is an integrated set of tools to proactively monitor, manage and protect your network.

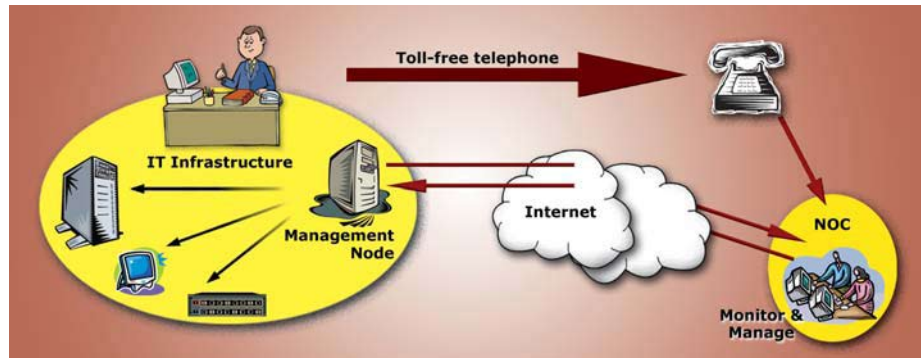

"We use the 'SAAZ' as IT management tool which is being used by companies like Sony, LG and CMU."

### Lower and Predictable IT costs

- A predictable monthly cost that can be budgeted with no surprises.
- Eliminates the need to build costly in-house expertise on IT infrastructure and security technology.
- Provides economies of scale that let small and medium businesses get "Fortune 500 class" IT management and support at an affordable cost.

## How it works

- When Rescott, LLC engages with you, the first step is to assess the network, perform improvements and create network usage policies. We take all of the steps necessary to standardize your network for ease of use and administration. We want to make the network easy to use for you and easy to manage for us.
- We then install securely encrypted software and antivirus software on the server and desktops constantly performs checks on the Servers, Network, Firewalls and Desktops and alerts the engineers at the Rescott LLC's Network Operations Center who in turn proactively take appropriate steps to prevent the potential issue from becoming a real problem.
- Using SAAZ the engineers at the Rescott Network Operations Center

- perform preventive maintenance tasks such as deploying anti-virus updates, patches, removal of spyware, "cleaning" of machines, tuning of servers, updating firewall rules and much more to keep the client's network running optimally.
- When an end user encounters a problem, he or she calls a toll-free number and an engineer at the Rescott Network Operations Center responds. The engineer assists the user or when necessary, with permission of the user, the engineer takes remote control of the machine and resolves the problem directly. In our experience we have been able to resolve close of 93% of all user issues remotely.
- Should the issue be such that it cannot be resolved remotely (as is the case with failure of hardware), Rescott can dispatch a technician to your site if you are in our service territory.
- Data collected by the management node is analyzed and converted into meaningful reports which are available online for you to see. Rescott reviews the reports with you to identify incorrect usage or potential security problems and to make improvements to the network.
